Connecting to the HWS Wireless Network
Mac OS 10.5

8/26/2009

To connect to the HWS wireless network:

1. In the upper right of your screen, click Airport > Open Network Preferences

2. In the lower right corner click Advanced

3. Click the 802.1x tab

4. On the bottom left of the box click the plus sign (+) and choose to add a User Profile

5. At the flashing cursor, name the configuration HWSWireless

6. Enter your HWS User Name and Password

7. From the dropdown, select HWSWireless

8. Under Authentication, uncheck all items except for PEAP then click OK
9. Click **Apply**

10. Click **Advanced**

11. Click the **AirPort** tab

12. To add a new network
   
   Click **plus sign (+)**
13. In **Network Name** enter, **HWSWireless**

14. In the **Security** drop-down menu, select **802.1x WEP**

   *Note*: Password and username should automatically populate in the User Name and Password fields.

15. Select **Remember this Network**

16. Click **Add**

17. In the **Preferred Networks** box, verify that the **HWSWireless** entry is at the top of the network list

   HWSWireless should be listed first to ensure that it will be used to enter the campus wireless network

18. Click **OK** and **Apply**

19. Open **Safari** browser and go to a non-HWS web site to confirm connectivity; if the site does not open, try restarting your computer

   If you have any trouble with the wireless setup process, please contact the Help Desk in the Library Learning Commons or 315-781-4357 (ext. 4357/HELP on campus) or helpdesk@hws.edu.
