

ANNUAL
Fire Safety Report

October 1, 2017

HOBART AND WILLIAM SMITH
COLLEGES

Fire Safety 2016

HEA Title IV, Part G, Section 485 (i)

This provision was signed into law on August 14, 2008 by President George W. Bush. The law requires any institution maintaining on-campus student housing to issue an annual fire safety report. The report must include statistics regarding the number/causes of fires, number of fire injuries and deaths, and value of property damage. It also must include information on each on-campus student housing fire safety system, the number of regular mandatory fire drills, fire safety policies and education programs, and plans for any needed fire safety improvements. The statistics also must be submitted to the Secretary of Education.

Campus Safety maintains a log that records all fires in on-campus student housing facilities.

On Campus Student Housing Fire Safety Systems

On-campus student housing has a number of fire safety systems installed. Student residences are protected by a Simplex fire detection system which consists of a series of smoke and heat sensors, fire alarm activation pull stations, as well as horn and strobe alarms that are hard-wired to a central monitoring station that is staffed 24 hours per day, 7 days a week, 365 days a year.

A horn base is installed in every sleeping room to insure that all residents are able to hear the alarm. The system is tested once a year in accordance with NFPA and NYS Fire Code requirements by a certified alarm system specialist. Residence halls have an automatic fire sprinkler system installed aside from the exceptions noted in the table 1.1. All on-campus student residences have five-pound dry chemical ABC-type extinguishers located at various places in the buildings. External fire escapes are available in multi-story building where required by code.

Floor plans marked with the primary and secondary egress routes are mounted at various locations throughout the buildings. The evacuation signage also includes the safe meeting area so that members of Campus Safety and Residential Education can take a census and provide additional instructions for occupants who have been evacuated from the building. Per NYS Fire Code, all buildings with gas appliances are equipped with carbon dioxide detectors.

(See Table 1 next page)

Table 1.1: On-Campus Student Residence Buildings and Fire Safety Systems 2016

Emergency Evacuation/Fire Drills

Campus Safety will conduct four mandatory fire drills (totaling 228) in all on-campus student residences during the academic year in accordance with the Fire Code of New York State (§405). Fire drills will also be conducted during the summer at the time a building is occupied for a camp or event as required by the NYS Department of Health. Drills will be coordinated with the Geneva Fire Department and are intended to familiarize all occupants with the drill procedure.

Responsibility for the planning and conduct of drills will be assigned to the Campus Safety supervisor of the shift that the drill is conducted on. Drills will be conducted unannounced at varied times and under different conditions that might be encountered in a real fire. A record of each drill will be kept that includes the following information:

- **Identity of the person conducting the drill.**
- **Date and time of the drill.**
- **Notification method used.**
- **Staff participants.**
- **Number of occupants evacuated.**
- **Special conditions encountered or simulated.**
- **Weather conditions.**
- **Time required to accomplish complete evacuation.**
- **If a fire escape was utilized during the evacuation.**

Fire drills in residence halls are scheduled periodically, in accordance with National Fire Protection Association and local fire-safety codes. Fire drills are intended to make sure occupants are aware of exit locations (KNOW TWO WAYS TO GET OUT) and that emergency-response personnel know their respective and mutual responsibilities.

Students should take fire alarms seriously, evacuate when they sound, and follow the directions of the person in charge. It also is important to become familiar with the location of exits. In case of an emergency evacuation, the best advice is stay calm. Safe escape may depend on thinking clearly and remembering what has been practiced. Residence staff will check residence rooms during fire alarms. "Students who fail to exit a building when the fire alarm sounds will be fined \$50" (*Handbook of Community Standards* pg. 70).

Procedures for Students and Employees to Follow in Case of a Fire

- **Remain calm.**
- **If your door is cool to the touch: Open door slowly.**
- **If there is smoke or heat, crawl on your hands and knees.**
- **Evacuate the building via designated emergency egress routes, remember two ways out; use a fire escape if needed. Do not use elevators!**
- **Activate a nearby fire alarm pull station if one is accessible - ON YOUR WAY OUT.**
- **Immediately report the fire to Campus Safety - ext. 3333 from an on-campus phone, or call (315) 781-3333 from a cell or off-campus phone.**
- **Proceed to the EMERGENCY MEETING PLACE to await further instructions.**

**Report fires to
Campus Safety
- ext. 3333 from
on-campus phone, or
call (315) 781-3333
from a cell or off-
campus phone.**

If you are caught in a fire

- **Do not open a door that feels hot.**
- **Close doors behind you as you exit.**
- **Crawl if you are in a smoke-filled hallway (STAY LOW AND GO).**
- **Remember two ways out!**
- **Stay alert and report anyone who might still be in the building.**
- **If you are unable to leave your room - seal the bottom of your door with a wet towel, sheet or article of clothing.**
- **Hang a towel or sheet from your window and announce your location.**
- **STOP, DROP AND ROLL if your clothing catches fire.**
- **Do not exit windows above the ground floor unless there is a fire escape present.**

**** REPORT ANY FIRE OCCURRENCE TO CAMPUS SAFETY (NO MATTER HOW SLIGHT).**

Policies Regarding Fire Safety Education & Training Programs

Smoking Policy (*Handbook of Community Standards pg. 57.*)

Smoking is prohibited in all college owned or operated buildings, intercollegiate events (both indoor and outdoor, and, based on New York State's Clean Indoor Air Act, in all indoor spaces, where no person shall smoke or carry a lighted cigar, cigarette (including electronic cigarettes and smoking devices), pipe, or any other form of smoking object. Students smoking indoors which results in a full fire alarm will be charged an automatic \$500 fine.

New York State Public Health Law (Subdivision 13 of section 1399-o)

Smoking shall not be permitted and no person shall smoke in the following indoor areas:

13. All public and private colleges, universities and other educational and vocational institutions.

Fire Safety (*Handbook of Community Standards pg. 69-71.*)

Fire safety is a concern in which a student's actions or inactions can have great impact on other students and the Geneva community. Students who violate fire-safety code and cause the institution to be fined shall be assessed the amount of the fine and other sanctions.

Each year members of the local fire department respond to many false alarms and in doing so put themselves and the community at risk. False alarms risk making everyone — especially students — complacent and less sensitive to the next fire call, which could be for a major life-threatening fire.

A computer-based central fire-alarm monitoring system, located in the Office of Campus Safety, is designed to provide warning of fire danger in campus buildings. Any alarm signal enables campus safety officers to enter that room. Localized alarms sound in all buildings. Response to alarms is by both Campus Safety officers and the Geneva Fire Department.

The following items are strictly prohibited to secure the Colleges property and the community's safety. Any illegal appliance that comes to the attention of a Colleges official will be confiscated and the student

will be referred to the appropriate hearing body or Vice President for Campus Life or designee.

These items are prohibited (this list is a reference and not exhaustive):

- Candles/open flame devices (a charge of \$50 will be assessed for each candle found)
- Incense
- Tapestries or other wall coverings, including flags
- Halogen or torchier lamps
- Extension cords (only power strips with surge protectors are allowed)
- Holiday lights
- Toaster ovens/hot plates/hot water pots/Foreman grills
- Coffee pots (units with an auto shut-off feature and Keurig-style coffee makers are allowed)
- Microwave ovens (except for Colleges-approved micro-fridges)
- Large refrigerators (above 3-cubic-feet)
- Fireworks/pyrotechnics
- Building lofts and other wood structures

To minimize the risk of fire, the following fire safety rules have been adopted. Violation of the rules will lead to disciplinary action. Questions regarding prohibited items should be directed to the Office of Residential Education or the Office of Campus Safety.

Open flames and burning

The use of open-flame devices or other burning materials, such as candles and incense, and the melting of wax to fabricate candles, is prohibited. Such materials will be confiscated. Students found responsible for setting fires may expect to be separated permanently from the Colleges. A charge of \$50 will be assessed for each candle found.

Fire extinguishers and other fire-safety devices

Fire extinguishers should be utilized only for their intended purpose and should not be removed from their assigned location. An extinguisher should be used only after the alarm has been pulled and the fire department has been notified. Then, those who are capable may attempt to control a small fire.

Unwarranted use of a fire extinguisher or any other tampering with fire alarms or devices is considered a serious offense that could lead to suspension from the Colleges. **A minimum charge of \$250 will be assessed to any student or floor residents who discharge, damage, or tamper with any fire-safety equipment other than to control a fire.**

Fire doors

Fire and smoke doors must be kept closed at all times. They are there to save lives and minimize damage to buildings and personal property.

Exit paths

Furniture is not to block exit paths.

Cooking and kitchens

Use of all cooking appliances in student rooms is strictly prohibited. Toaster ovens, microwave ovens, George Forman-type grills, hot plates, large refrigerators, burners, etc. are prohibited in rooms. A small kitchen area is provided in most residence halls.

Electrical usage

Caution should be exercised in the use of electrical appliances and power strips to prevent overloading of electrical circuits. Aerials for radios and other items of this nature are not permitted outside of rooms or on the building. Electrical wires leading from residence rooms to receptacles outside the rooms are prohibited.

Fireworks

All forms of pyrotechnics (firecrackers, cherry bombs, etc.) are prohibited by New York State law. A student found in possession of fireworks will be subject to severe disciplinary action, and the use of fireworks will be regarded as starting a fire.

Lofts and other structures

Building lofts and wood structures are prohibited. Shelves and other room structures may not be attached to room furnishings, walls, ceilings, or floors.

Lighting and fire safety policy

Lamps of all kinds can be fire hazards. Research strongly suggests that a lamp's design and the way that it is used—even more than its light source—determine its safety. Through the residence education program, the Colleges will monitor the lighting arrangements in students' rooms and require that students observe the following rules in using lamps in their residences:

- (1) The use of halogen lamps, particularly halogen floor or torchier lamps, is prohibited because their bulbs reach high temperatures quickly causing the shades to melt, and their small bases with long segmented poles are often unsteady, increasing their potential for tipping over.
- (2) Never touch a light bulb with bare fingers. Many retain heat long after being switched off. Skin oils can cause hot spots that may cause bulbs to fail or burst. Compact Fluorescent Lights (CFLs) are strongly suggested to be used for lighting as they are cool to the touch and save energy.
- (3) Floor lamps should be placed on a level surface away from walls, furniture, or contact with combustible materials. It is important not to leave bulbs bare—they must have a covering to avoid fires. Lamps should not be placed on beds or in lofts where the lamp or a frayed cord could ignite the bedding.
- (4) Clothing or other combustible materials should never be hung on or from any light source.
- (5) Draperies may be allowed with the Director of Residential Education's permission. Tapestries are not allowed.
- (6) Interior decorative lights are not allowed.
- (7) Lamps with defective switches, frayed cords, unsteady bases, or broken poles should be discarded or immediately removed from service until properly repaired.
- (8) The use of multiple extension cords, "octopus plugs" or strip plugs is prohibited, as they overload circuits in the room. Placement of cords under carpeting or in locations where they will be walked on and damaged is also forbidden.
- (9) Turn off all lights when leaving a room for any extended period of time.
- (10) Consider alternatives to additional lighting; when placing furniture in the room, take advantage of existing lighting when locating study/reading areas.
- (11) In addition to one scheduled safety check per semester, resident advisers (RAs) are also encouraged to make periodic unscheduled room visits. Resident advisers are not trained as lighting and safety experts; however, when unsafe lighting arrangements are observed, RAs will note them as violations cited for correction.

Extension Cords

The use of multiple extension cords, "octopus plugs" or strip plugs is prohibited, as they overload circuits in the room. Placement of cords under carpeting or in locations where they will be walked on is also forbidden.

Motorcycles and motorbikes

Motorcycles and motorbikes are not permitted in the residence halls.

Space heaters/air conditioners

Due to fire safety concerns and possible overloading of electrical circuits, space heaters and air conditioners are not permitted, unless approved by the assistant director of housing operations for residential education under the advisement of the Office of Disability Services.

For more information about fire safety, contact Campus Safety, ext. 3000, or consult Living Safely, published annually by the Office of Campus Safety. Information is also available from the Consumer Product Safety Commission at (800) 638-2772 or www.cpsc.gov, and Underwriter's Laboratory (800) 787-8540 or www.ul.com.

Fire safety education programs and fire safety training programs associated with on-campus student housing facilities

- Hobart and William Smith Colleges provides Residential Education Staff and Resident Assistants (RAs) fire safety training involving the NYSOFFPC Fire Marshal, Geneva Fire Department and Campus Safety.
- The Office of Residential Education provides fire safety training to its RAs via an online fire training program.
- Trained RAs conduct fire safety discussions with residents during their fall semester floor meetings and
- Campus Safety Officers, during Orientation, conduct fire safety talks to all students.

Plans for future Improvement in Fire Safety

Hobart and William Smith Colleges works closely with the New York State Office of Fire Prevention and Control and the Geneva Fire Department to address and correct any deficiencies in an ongoing effort to mitigate fire safety issues. HWS strives to continually improve our current fire safety program.
