Throughout this eleventh annual day of presentations by Hobart and William Smith seniors and Masters of Arts in Teaching students, we honor the best traditions of a liberal arts education — taking academics outside the classroom, giving individual academic passions a broad audience and exchanging ideas across the HWS community. As you will see, many Senior Symposium panels connect students’ work across disciplines, sites and insights in a way that highlights the HWS commitment to interdisciplinary study.

We invite you to engage today with our panels of students in this exciting synthesis of their college work. Come explore connections among eSports, the 1936 Olympics, baseball, Arthur Ashe (“Ways of Winning” panel at 8 a.m.); among short fictions, trombones, enzyme kinetics and fossil preservation (“Composition and Concentration” panel at 11:15 a.m.); or among the role of student newspapers, democracy, species tree reconstruction and transitional justice (“Evolution” panel at 4:05 p.m.).

*Please note that panel presenters are listed alphabetically, not necessarily the order in which the students will present.*
