

# Changing Document Size in Adobe InDesign:

## Step 1: File

## Step 2: Document Setup

The screenshot displays the Adobe InDesign CC 2019 interface with a document layout template. The layout is organized into a grid with the following sections:

- Abstract**: Located at the top left.
- Title**: Located at the top right.
- Name**: Hobart and William Smith Colleges, located below the title.
- Introduction**: Located in the middle left.
- Conclusions**: Located in the middle right.
- Method**: Located in the bottom left.
- References**: Located in the bottom right.
- Results**: Located at the bottom left, below the Method section.
- Figure 1** and **Figure 2**: Located at the bottom center, each with a placeholder box.

The **File** menu is open, and a red arrow points to the **Document Setup...** option. The **Properties** panel on the right shows document settings:

- Document: [Custom]
- Width: 48 in
- Height: 36 in
- Margins: 0.5 in (top, bottom, left, right)
- Page: 1
- Quick Actions: Import File

Step 3: Change Size

**Document Setup**

Intent: **Print** ▾

Number of Pages:   Facing Pages

Start Page #:   Primary Text Frame

Page Size: **[Custom]** ▾

Width:  Orientation:  Portrait  Landscape

Height:

**Margins**

Top:  Inside:

Bottom:  Outside:  

> **Bleed and Slug**
